

CAAS Accreditation

Tri-State Ambulance and Gundersen's Patient Coordination Hub earned recognition in August 2021 from the Commission on Accreditation of Ambulance Services. This accreditation certifies that our service meets the most rigorous standards determined by the ambulance industry to be essential as a modern emergency medical services provider.

Company Cultures

Our commitment to proudly care for our communities and families with compassion, innovation and excellence is more than just a mission statement. It's reflected in our actions every day.

We strive to create an unparalleled work experience for all employees; deliver the best possible service and value to our customers, communities and partners; and always have the resources (energy, human and financial) to do both. Our employees have respect and compassion for each other, are goal oriented and possess uncompromisable integrity.

Our Communities

Gundersen Health System is in the heart of the 7 Rivers Region—one of the best kept secrets of the Upper Midwest. The area offers abundant activities for the outdoor enthusiast while maintaining a big city vibe for cultural, dining and shopping opportunities. The Twin Cities and Madison are both about a two-hour drive away, with Chicago reachable in four hours. In other words, the 7 Rivers Region offers all the benefits of a metropolitan area but at a lower cost of living. It's a win-win when combined with our competitive pay and benefits.
